Prolegomena

The SAS Network-Wide Event I and Mid-Term Review Meeting was held on December 2-5 2019 at LAAS-CNRS in Toulouse, France. With respect to the location: the envisioned location for this NWE I was originally the University York, as mentioned in Annex I of the SAS Grant Agreement Part B. However, taking into account the Brexit, the uncertainty regarding traveling to the UK, and based on the suggestion of the REA Project Officer Nina Poumpalova (Feb 5, 2019), it was decided within the SAS Consortium to hold the SAS NWE I at LAAS-CNRS in Toulouse and to have the SAS NWE II in York. **This Deliverable 4.3 (D25) is the report of the SAS Network-Wide Event II that took place from June 30 till July 3, 2020.**

Furthermore, and due to the actual COVID-19 crisis, it was impossible to have a Face2Face Network-Wide Event II in York as originally foreseen. This restriction has been overcome by shifting to online meetings through ZOOM for the full Network-Wide Event.

1. Agenda

The SAS Network-Wide Event II took place from June 30 till July 3, 2020 through ZOOM Online Meetings due to the ongoing COVID-19 crisis.

On Tuesday, June 30 (Day 1), the Project Manager welcomed briefly the ESRs after which a soft-skill training **Tutorial on Project Management** was given by D. Butler from RETT. This training was followed by the ESR Council. In the afternoon, two soft-skill trainings and one scientific/technical training were scheduled: **Developing your goals and taking action every day which cover setting goals and managing tasks**, given by key-note speaker C. Pullein, **Unconscious Bias** given by L. Jones from RETT, and a scientific/technical training on **Safety cases for Autonomous Systems Part 1** given by I. Habli (Univ. of York).

Day 2 of this online NWE, Wednesday, July 1, started with two scientific/technical trainings: **Safety cases for Autonomous Systems Part 2** given by I. Habli (Univ. of York), and **Safety of Machine Learning in Autonomous Systems**, given by R. Hawkins (Univ. of York). In the afternoon, the SAS Project Coordinator welcomed all the ESRs, the supervisors and their colleagues, the representatives of the partner organizations, and the management support team who attended this online NWE (list of the participants can be found below). The Project Coordinator gave an overall view and state of play of the SAS project, which was followed by the ESRs 1-7 presentations regarding each ESR's research progress.

At the beginning of Day 3, July 2, the ESRs 9-15 presented their research progress to everyone. This presentation session was followed by the Supervisory Board meeting between consortium members and the ESR representative Luca Vittorio Sartori. Afterwards, three work-package parallel sessions took place where technical aspects and practicalities were discussed and further fine-tuned regarding the three SAS Scientific Work Packages. Day 3 of this online Network-Wide Event was concluded with a presentation regarding the conclusions of this SAS Project Meeting and the SAS Project's next steps. In the evening, the ESRs ended their third day with an online social activity where they could interact in a fun, social and informal environment, and share funny stories and experiences.

On the last day, Friday July 3, the ESRs and those interested attended two more scientific/technical trainings: **Human Factors and Ethics for Autonomous Systems** given by M. Sujan (Human Factors Everywhere), and **Formal Verification of Autonomous Systems** given by S. Foster (Univ. of York). In the afternoon, an interactive workshop took place between the ESRs and the Project Manager regarding the SAS communication strategy evaluation and Intranet PODIO evaluation.

All online training sessions were attended by both the SAS ESRs and consortium members interested as well as ESRs from other (ETN & ITN) projects, such as PETER¹, SCENT², and ETOPIA³ as indicated in the following table.

REPORT ESR Researcher Council MSCA ETN SAS NWE2

June 30, 2020: 11:15 – 12:15 (BST)

Online Meeting through ZOOM

1. Secondment (virtual) preferences:

ESRs unanimously agreed that virtual conferences and secondments should be implemented as less as possible for the following reasons:

- a) Communication and interaction between an ESR and the secondment organization is slow and hard to manage;
- b) A goal of the secondment is to change the environment, to see how things are organized and regulated in a different place. This goal cannot be reached by online means;

2. Activities on Social media + Podio evaluation:

- a) ESRs agreed that the publishing strategy should be changed so blog posts would emerge on social media on a more regular basis. It was decided to:
 - ask the Communication manager to include on Podio an option “Date to publish”
 - reconsider blog reviewers;
- b) Another suggestion that was proposed is creating a profile in <https://medium.com/> that would increase the awareness of people about the SAS project.

3. ResearchGate:

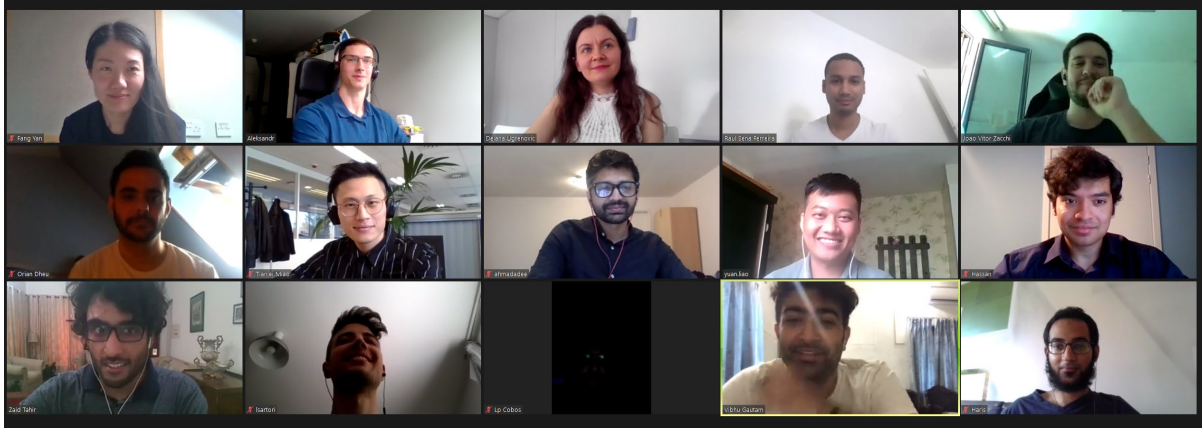

Luis-Pedro Cobos volunteered to be responsible for the ResearchGate profile.

Any other business:

4. ESRs unanimously decided to ask for the improvement of SAS templates (presentation/report documents).

Actions/Summary + AOB

- **ESR6 Luca**
 - Research slowed down due to COVID-19
 - Has to do experiments in the lab, but up to now quite some restrictions for doing so.
 - Many people stay at home, including technical support.
 - Experimental part is important element in PhD.
- **ESR7 Zaid**
 - Secondment at LAAS delayed
 - Suggestion H el ene: replan strategy about what to learn at LAAS.
 - Virtual secondment?
 - Experience around simulations tools lacking now.
 - Would need extension for Milestone 2.4 and Deliverable 2.4.
 - Framework is ok, but learning about simulation tools is missing.
 - Would return to the UK withing 2-3 week (Mid July, 2020)
